### Skills

- **PHP;**
- **Laravel;**
- **Javascript;**
- **React;**
- **AWS;**
- **Huawei;**
- **Postgree SQL;**
- **Git / Github;**
- **Tailwind CSS;**
- **Wordpress.**

### Work Experience

#### Art Malha Confeccões, São Benedito

##### Front-End Developer

01/2024 - 06/2024

I developed an internal management system for order tracking and invoice management using **PHP** with the **Laravel** framework for the backend, providing a robust and efficient architecture. On the frontend, I implemented **React** to create an interactive and dynamic user interface, combined with **Tailwind CSS** for rapid and responsive styling.

The system was integrated with payment gateway APIs for generating and managing invoices, automating the process of issuing and tracking payments. I used **AWS** for hosting, ensuring scalability and high availability, while **Docker** containers were employed to simplify deployment and maintenance of the environment.

This solution significantly improved the workflow, increasing efficiency in order management and reducing errors in the billing and payment process.

#### Diamond&OPP, São Benedito

##### Front-End Developer

08/2023 - 12/2023

I developed a local e-commerce system for Diamond&OPP Digital Marketing using **WordPress** and **PHP**. This project involved customizing themes and plugins to create a user-friendly online shopping experience. I implemented features such as product management, order tracking, and secure payment gateway integration, enhancing the company's digital presence and customer engagement.

### Education

Computer Network Technician, Graduation Year (2024), EEEP - Isaías Gonçalves Damasceno, São Benedito - CE
